EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, lines 4 and 14, [type] has been deleted.

In claim 14, line 4, [type] has been deleted.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or suggest the combination that would teach *an electrical bridge detonator or chip slapper capable of being initiated by less than about 50 mj of energy at the end of about a 1 millisecond charging time window,* in combination with the other limitations of independent claims 1, 8 and 14. The applicants' have convincingly argued the criticality of this feature on page 10 of the response filed 10/25/2006, wherein reference is made to paragraph [00024] of the specification wherein it is stated, "The CDU/detonator of the present invention is also capable of being pulsed charged from a remote source from about I meter to at least about 100 meters. A pulse charging time of at least one millisecond (ms) can be

Application/Control Number: 10/676,704

Art Unit: 3641

achieved through extended twisted pair transmission lines and/or coaxial cables. A 1 ms pulse charging time allows for the transmission inductance to be large, thus permitting long cable lengths between a charging source and a (CDU). Detonator safety is thereby enhanced because the detonator-fire set can remain uncharged and therefore safe until at least about I ms before the intended firing time." In paragraph [00025] of the specification further support for the criticality of the claimed 1 millisecond charging time window is found, wherein the applicants state ""To increase reliability, the detonators of the present invention are designed to discharge at the end of the 1-ms charging window, such that the capacitor and switch are minimally stressed electrically due to the short time at which they see a high voltage " Brooks (US 6,386,108 B1) does not disclose the claimed charging time limitations and discusses a charging time of several minutes (see column 4, lines 44-53). Wu et al. (US 6,386,108) similarly does not disclose the claimed charging time limitations of independent claims 1, 8 and 14.

- 3. This statement is not intended to necessarily state all the reasons for allowance or all the details why the claims are allowed and has not been written to specifically or impliedly state that all the reasons for allowance are set forth (MPEP 1302.14)
- 4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James S. Bergin whose telephone number is 571-272-

Application/Control Number: 10/676,704

Art Unit: 3641

6872. The examiner can normally be reached on Monday - Wednesday and Friday, 8.30 - 5.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 571-272-6873. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
